6360 ALS®/SLS Mid-Ride, Level III Retention™, for Pistols

The Model 6360 is a distinctive holster design that features Safariland's Automatic Locking System (ALS®). The Model 6280 is the base for this holster as it utilizes the unique SLS rotating hood design for a smoother single-motion draw and greater protection against attempted weapon takeaways.

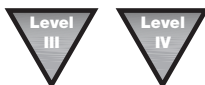

The Model 6360 is classified as a Level III Retention™ holster with the SLS as the primary security system, yet it also includes an internal locking device that retains the weapon in all directions when the primary device is open. This holster design offers three distinct design differences from previous models. First, once the weapon is holstered, it "locks" into place, providing an extra measure of security from the standard Level II Retention™ holsters. Second, the holster is completely operable with the thumb, making it very instinctive to use. And finally, once the retention devices are released, the weapon can be drawn straight out of the holster with no twisting or other motion required.

The 6360 features a tensioning device, molded sight track and SafariSuede™ lining to protect the gun's sights and finish. Its wraparound construction and SafariLaminate™ structure provides the strongest design combination available. The Safariland rigid UBL anchors the holster and stabilizes it on your duty belt with hardened aerospace fasteners. Safariland offers Training DVDs for various products. For more information on retention levels and this product please review TV-1002D, TV-1017D and TV-1020D.
